

## COVID-19 (Coronavirus)

# Staying safe while protesting during the pandemic

### Wear a face mask

Protect yourself and those around you by slowing the spread of germs.

### Use hand sanitizer

Be aware of your hands and wash or sanitize them often.

### Bring water

Make sure to stay hydrated and bring unopened water bottles for people in need if possible.

### Physically Distance

Whenever possible, stay 6 feet away from each other.

**After the event** there's a chance you could expose others to the coronavirus. If you were not able to stay 6 feet from others, prevent the spread of COVID-19 by staying home for 14 days and avoiding close contact with older family members or other people at higher risk.

**Spread the Facts**
